DESIGN ► DEVELOP ► DELIVER

ANOTHER MASTERPIECE OF INNOVATION FROM AGAPPE

MISPA-*i*3
Cartridge based Specific Protein Analyzer

- ✓ UCS Technology – Sensitivity & Linearity at its best
- ✓ Smart Card Calibration
- ✓ Prefilled cartridges with reagents
- ✓ Automatic pre-dilution of samples
- ✓ Voice message assistance for user interaction
- ✓ Fully closed operation. No user interference
- ✓ 3 QC files for each parameter for 30 days
- ✓ 1000 patient results storage
- ✓ 30 Min battery backup

MISPA-*i*₃

Cartridge based Specific Protein Analyzer

Mispa i3 is an Automated Specific protein analyzer offers the benefits of a Fully Auto Analyzer, such as guaranteed precision with lesser investment to test those specific as well as regular protein assays.

Mispa i3 uses Nephelometric technology for protein determination and supports the clinical management of a variety of disease states, such as cardiovascular risk, rheumatoid diseases, inflammation, kidney disease and several other specific protein assays.

Technical Specification

Principle	: Nephelometry and Photometry	Display	: 7" colour TFT Display
Calibration	: Smart Card (Integrated Circuit Card)	Printer	: Inbuilt Thermal Graphical Printer
Light Source	: Laser LED 650nm	Barcode Interface	: Hand held (optional)
Laser Power	: 5mW	Reagents	: All in a Single Cartridge (with Barcode)
Photo detectors	: Laser detector	Minimum Sample volume	: 5 uL
Temperature Control	: Dry heating by Rubber heater	Syringe Pump	: 500uL with 1 uL resolution
Temperature range	: Controlled 37 degrees Celsius	PC interface	: RS 232 Port
Mixing	: Automatic by motor	Power Supply	: 85 - 240 VAC 50/60 HZ
Zero setting	: Automatic	Power Consumption	: 100W
User Interface	: Touch screen or External Key board		

Parameters

Product Name	Assay Range
ASO	50 - 1000 IU/mL
CRP	0.5 - 320 mg/L
RF	10 - 100 IU/mL
HbA1c	3 - 13 %
CYSTATIN C	0 - 10 mg/L
MICROALBUMIN	5 - 200 mg/L
FERRITIN	1 - 1000 ng/mL
IgE	5 - 1000 IU/mL
D-Dimer	0 - 20 ug/dL
