

Specific Protein Analyzer

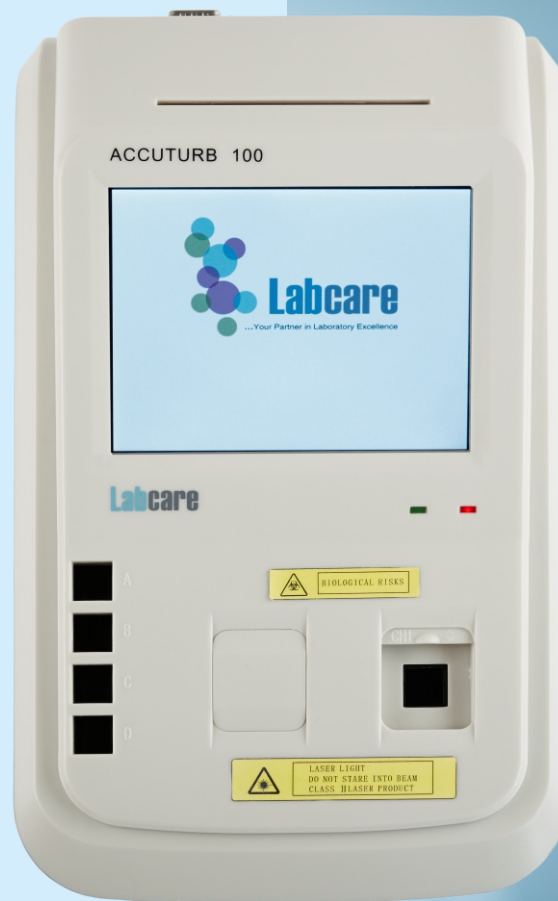

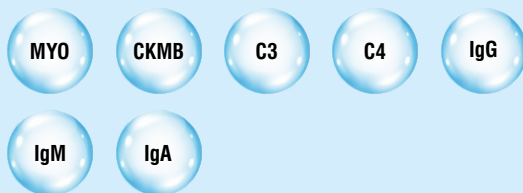

ACCUTURB-100

POINT OF CARE TESTING

Fast-and-quantitative tests for specific proteins controlled by microcomputer

Coming Soon

Rapid

New fast immunity measurement system.
Test results can be reported within 2 minutes.

Convenient

RF type non-contact card of reagent calibration information, no reagent wastage for calibration, in-built incubator, the human-machine touch screen is easy and visual to operate.

Quantitative

Dual system of nephelometry and turbidimetric tests; high sensitivity, wide testing range.

Reliable

Specimen dilution and calibration of hematocrit (HCT) make the result uniform.
